

SOCIAL STUDIES

5th Grade Social Studies

We had such a blast studying the United States. We started our month off by talking about Civics for All. We got to pretend to be members of the president's cabinet, supreme court justices and members of Congress.

From there we travelled back in time to study the United States post American Revolution including studying the Constitution. We wrapped up our unit with a mini project on the Industrial Revolution.

When 5th grade returns in May we will pick up with America at the turn of the century and continue all the way up until present day America!

Welcome to Egypt!!

During this unit students will learn about Egypt's geography, culture, people and history. The students will receive a few lessons on the background of Egypt and come together to help shape our curriculum.

Some things we will discuss are

- Learn how natural products such as papyrus helped to produce important technological developments.
- Investigate the traditional culture of Egypt.
- Compare and contrast hieroglyphics with modern written English.
- Analyze images to understand the culture, housing, clothing, and food of Egypt.
- Gather evidence to write informational brochures
