

Social Studies

Ms. Schweiger tschweiger@schools.nyc.gov

Third Grade Social Studies

During this unit 3rd grade will travel to China!

This unit will follow a similar format to our previous unit when we travelled to Nigeria. We will learn about China's geography, culture, government and people. We will spend time reading Chinese folktales, listening to Chinese music and recreating Chinese art. We will learn about and celebrate Chinese New Year. The end of the unit will wrap up with an informational writing piece on China. This unit will be extra special because in February there will be visitors coming to the school from China!

Fifth Grade Social Studies

A Case Study of the United States

This unit will teach the 5th grade all about the United States. We will discuss the geography, culture and government of our country. Historically we will start around the end of the revolution and discover the challenges the United States had becoming a new nation. The second part of the unit will focus on westward expansion, the civil war, and civil rights.

We will also be starting a Civics For All curriculum. This program, Civics for All is a component of Mayor DeBlasio's Ten Point Plan for DemocracyNYC and the Civics for All curriculum builds on existing work to strengthen civics and social studies education,
